

Would the school be willing to let us use a car?

Maybe. Willing to lease a car (added to expense report)

Willing to work with us on how long we need a car

Apple & android support?

Whichever we think will work best for us

Do we have a budget?

Yes, amount unknown

Provide estimate to Hasan

What does the project look like in your mind?

How closely do you think that can be followed?

What are the priority ideas?

What needs to happen first / proof of concept?

What is the best way to keep you in the loop?

What is the first thing we need to accomplish?

Figure out what info we can get out of a car

What does the final product look like?

Academic / research project but needs an app

An app has some functionality related to the project goal

Be able to display route

Generate data real or fake (database ge software)

Plan based on expect milage where to get gas along expected

Target demo

Regular cars/vehicles

Info chip will need to read

Load

Heater/ac running

Anything to calculate Gas consumption
